2．Regular Reports （定期報告）

① Detection Status of Computer Virus（コンピュータウィルス検出状況）

About the computer virus information in April, the Office has already informed at last staff meeting.

- Detail Information: "How to uninstall BrowserProtect?", http://www.cseas.kyoto-u.ac.jp/info/en/2013/04/4936.

In this month, the Office could discover the computer virus in several USB memories of the staff. Maybe, the infected route is the private PC which the Center hasn't managed. It is difficult to clean up it in the USB memory. Therefore, the Office strongly recommends to install the latest anti-virus software in your private PC. And then, **PEASE look over the following information.**

    - **Create "Autorun.inf" folder on the top of removable media.**

       http://www.cseas.kyoto-u.ac.jp/info/security/ (in English and Japanese)

And then, please check about the general computer security.

    - **"Update of the computer security": http://www.csaes.kyoto-u.ac.jp/info/en/2012/01/3118**
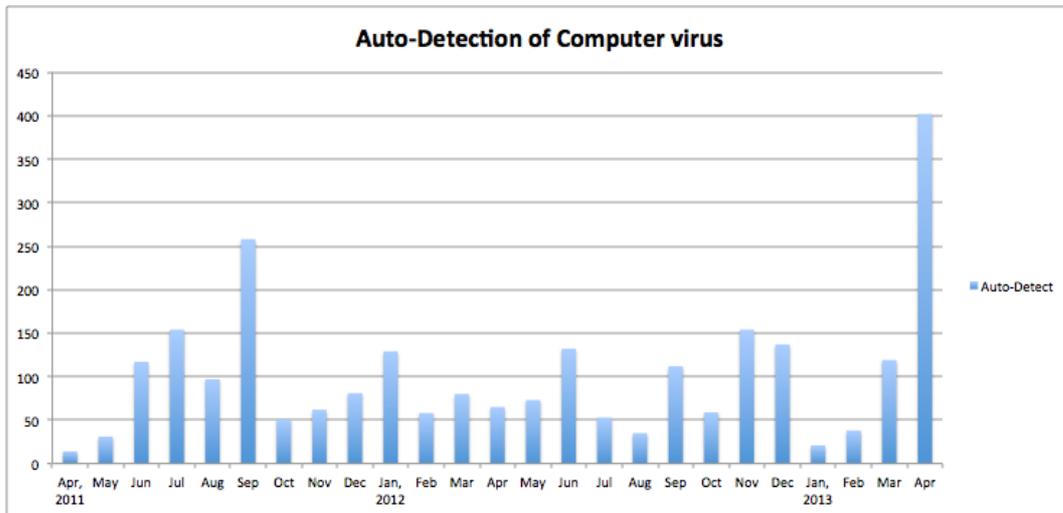

* "Auto-Detection" is the number of a malware which can be detected by our anti-virus software.
