

# How to send large files.

## - Use of Online Storage Service called "FilePost" -

June 6, 2012

Center for Southeast Asian Studies, Kyoto University: Kitani.

### [Features]

- 10 files, total 1GB
- Period: 3 days
- Total Download size: 1.5GB
- No registration required, Multilanguage support, and the support of various devices, such as iPhone, iPad, Android smartphone, and so on.

I'd like to explain both of sending and receiving methods.

### [How to send]

I would like to explain the approach for sending the download page manually because it aims to prevent the miss operation.

1. Access to <http://file-post.net/en/>
2. Click on "Send File" in the upper navigation menu.
3. Input the necessary information in the form and click on "Send File" button.
  - \* I strongly recommend the installation of the password for preventing the information leak.
  - \* Select "Myself" in the setting of "Mail by:".
  - \* Select "Expired in:"

Send File  Remember [?]

From: (Your Name) (Your e-mail) [?] [Save]

To: Dear (Recipient Name) (Recipient e-mail) [?]

Mail Subject:  
Sending file for you

File(s) to be sent: [?]  
ファイルを選択していません  
10 files/1000 can be sent.

Message for Recipient:

Options:

Password: (only alphanumeric) [?]

Expired in: 1 day

Mail by:  
 Myself [?]  
 FilePost [?]

Show status:  
 Yes  
 No

4. When the upload completion page is displayed, click on "Access to Download URL".
5. When the download page is displayed, copy the URL.

**Mr./Ms. Recipient Name, You have file(s) from Mr./Ms. Your Name.**

Download password is required. Enter below and press "Submit" button.

PASSWORD:

6. Send the URL and the password to the recipient person.
