10. Open “System Preferences” in the Apple menu.

Quick Setup Guide for Network Printer

- Brother for Mac Users -

11. Click on “Print and Scan” and click on “+” button.

12. If the printer name is displayed in “Default” panel, select and click on “Add” button.

* Else, click on “IP” upper menu and input the printer’s IP address to “Address” dialog box. Then, select and click on “Add” button.

* In case of Color Printer, the Office recommend to check the color or monotone setting when you print because the color printer toner cost is very expensive (The Office hasn’t provided the toner).
